Rule 55 Liability of Carriers

- (A) For the purpose of international carriage governed by the Montreal Convention, the liability rules set out in the Montreal Convention are fully incorporated herein and shall supersede and prevail over any provisions of this tariff which may be inconsistent with those rules.
- (B) Successive carriers
Carriage to be performed under one ticket or under a ticket and any conjunction ticket issued in connection therewith by several successive carriers is regarded as a single operation.
- (C) Laws and provisions applicable
 - (1) Carriage hereunder is subject to the rules and limitations relating to liability established by the convention (Rule 1, (definitions) herein) Unless such carriage is not "international carriage" as defined by the convention (Rule 1, (definitions) herein).
 - (2) To the extent not in conflict with the provisions of paragraph (1) above, all carriage under this tariff and other services performed by each carrier are subject to:
 - (a) Applicable laws (including national) laws implementing the convention or extending the rules of the convention to carriage which is not "international carriage" as defined in the convention), government regulations, orders and requirements;
 - (b) Provisions set forth in the passenger's ticket;
 - (c) Applicable tariffs; and
 - (d) Except in transportation between a place in the United States and any place outside thereof, and also between a place in Canada and any place outside thereof, conditions of carriage, regulations and timetables (but not the times of departure and arrival therein specified) of carrier, which may be inspected at any of its offices and at airports from which it operates regular services.
 - (3) Carrier's name may be abbreviated in the ticket and carrier's address shall be the airport of departure shown opposite the first abbreviation of carrier's name in the ticket; and for the purpose of the convention, the agreed stopping places are those places, except the place of departure and the place of destination set forth in the ticket

and any conjunction ticket issued therewith or as shown in carrier's timetable as scheduled stopping places on the passenger's route. A list giving the full name, and its abbreviation of each carrier concurring is published in this tariff.

(D) Limitation of liability

(1) Carrier is not liable for any loss or claim of whatsoever nature (hereinafter in this tariff collectively referred to as "damage") arising out of or in connection with carriage or other services performed by carrier incidental thereto, unless such damage is proved to have been caused by the negligence or willful fault of carrier and there has been no contributory negligence of the passenger.

(2) The carrier is liable for damages sustained in the case of destruction or loss of, damage to, or delay of checked and unchecked baggage, as provided in the following paragraphs:

a. Except as provided below, the liability of the carrier is limited to 1,288 Special Drawing Rights for each passenger in the case of destruction, loss, damage, or delay of baggage, whether checked or unchecked, under the Warsaw Convention or the Montreal Convention, whichever may apply. b. Under no circumstances will carrier be liable for

damage to unchecked baggage not attributable to negligence of carrier. Assistance rendered the passenger by carrier's employees in loading, unloading or transshipping unchecked baggage shall be considered as gratuitous service to the passenger.

c. The passenger may make a special declaration that their baggage has a higher value than the carrier's maximum liability. If the passenger does so, then the passenger must make this declaration to the carrier at the time of check-in and, if required by the carrier, shall as per Rule 55(F), Excess Value Declaration Charge, pay the supplementary charge to allow for additional liability coverage in the case of destruction, loss, damage or delay of their checked baggage.

Note: This provision is not applicable to a person's mobility aid.

Exception: The carrier is not liable for the declared amount if it can prove that it is greater than the passenger's actual interest in delivery at destination.

In the case of transportation under the Warsaw Convention, no supplementary sum shall apply unless the declared amount exceeds 19 Special Drawing Rights per

kilogram of the total recorded weight of the checked baggage at the time the baggage is handed to the carrier.

d. The carrier is liable for the damage sustained in case of destruction or loss of, or damage to, checked baggage upon condition only that the event which caused the destruction, loss or damage took place on-board the aircraft or during any period within which the checked baggage was in the charge of the carrier. However, the carrier is not liable if and to the extent that the damage resulted from the inherent defect, quality or vice of the baggage. Further, the carrier's liability for the destruction, loss, damage or delay of baggage is subject to the terms, limitations and defences set forth in the Warsaw Convention and the Montreal Convention, whichever may apply, in addition to any limitation of defence recognized by a Court with proper jurisdiction over claim.

e. The carrier reserves all defences and limitations under the Warsaw Convention and the Montreal Convention, whichever may apply to such claims including, but not limited to, the defence of Article 20 of the Warsaw Convention and Article 19 of the Montreal Convention, and the exoneration defence of Article 21 of the Warsaw Convention and Article 20 of the Montreal Convention, except that the carrier shall not invoke Article 22(2) and 22(3) of the Warsaw Convention in a manner inconsistent with paragraph 1 hereof. The limits of liability shall not apply in cases described in Article 25 of the Warsaw Convention or Article 22(5) of the Montreal Convention, whichever may apply.

f. Canada only: Carrier will refund to the passenger any fees paid for the transportation of checked baggage that was delayed, damaged or lost.

g. Carrier is not liable for damage to a passenger's baggage caused by property contained in the passenger's baggage. Any passenger whose property caused damage to another passenger's baggage or to the property of carrier shall indemnify carrier for all losses and expenses incurred by carrier as a result thereof.

h. Carrier will refuse to accept any articles which do not constitute baggage as such term is defined herein, but if delivered to and received by carrier, such articles shall be deemed to be within the baggage valuation and limit of liability and shall be subject to the published rates and charges of carrier.

- (3) carrier is not liable for any damage directly and solely arising out of its compliance with any laws or with governmental regulations, orders or requirements, or from failure of the passenger to comply with same, or out of any cause beyond the carrier's control.

- (4) Liability - services of other airlines
 - (a) A carrier issuing a ticket or checking baggage for carriage over the lines of others does so only as agent.
 - (b) No carrier shall be liable for the delay of a passenger, or the loss, damage or delay of unchecked baggage, not occurring on its own line; and no carrier shall be liable for the loss, damage or delay of checked baggage not occurring on its own line, except that the passenger shall have a right of action for such loss, damage or delay on the terms herein provided against the first carrier or the last carrier under the agreement to carry.
 - (c) No carrier shall be liable for the death or injury of a passenger not occurring on its own line (see note).
 - Note: Except to the extent provided in rule 55 (liability of carriers) with respect to tariff C.A.B. No. 937, issued by Airline Tariff Publishing Company, agent, rules affecting liability of carriers for personal injury or death are not permitted to be included in tariffs filed pursuant to the laws of the United States, and Rule 55, is included herein, as part of the tariff filed with governments other than the United States and not as part of tariff C.A.B. No. 937 issued by Airline Tariff Publishing Company, agent, filed with the department of transportation.

- (5) carrier shall not be liable in any event for any consequential or special damage arising from carriage subject to this tariff, whether or not carrier had knowledge that such damages might be

- incurred.
- (6) Whenever the liability of carrier is excluded or limited under these conditions, such exclusion or limitation shall apply to agents, servants or representatives of the carrier and also any carrier whose aircraft is used for carriage and its agents, servants or representatives.
 - (7) Passengers must be present at the departure gate by the boarding time printed on the boarding pass. If they fail to do so, carrier reserves the right to cancel the space reserved. Passengers will be responsible for all costs associated with failure to comply with same. Carrier will not be liable for any loss or expense incurred.
 - (8) (US Only) In any event, liability of carrier for delay of passenger shall not exceed the limitation set forth in the convention.
 - (9) Mobility aids
Note: Notwithstanding the normal carrier liability as contained in this rule, the limit of liability will be waived for claims involving the loss of, damage to, or delay in delivery of mobility aids, when such items have been accepted as checked baggage or otherwise. In the event that a mobility aid is lost or damaged, compensation is to be based on the cost of the repair or replacement value of the mobility aid. In the event that a mobility aid is lost or damaged:
 - (a) The air carrier will immediately provide a suitable temporary replacement without charge;
 - (b) If a damaged aid can be repaired, in addition to (a) above, the air carrier will arrange, at its expense, for the prompt and adequate repair of the aid and return it to the passenger as soon as possible;
 - (c) If a damaged aid cannot be repaired or is lost and cannot be located within 96 hours following the passenger's arrival, the carrier will in addition to (a) above, replace it with an identical aid satisfactory to the passenger, or reimburse the passenger for the replacement cost of the aid.

Above, carrier, in furnishing gratuitous transportation, shall not be liable (the provisions of Rule 55 (liability of carriers) to the contrary notwithstanding) under any circumstances whether of its own negligence or that of its officers, agents, representatives or employees, or otherwise, and the person using such free transportation, on behalf of himself, his heirs, legal representatives, defendants and other parties in interest, and their representatives,

No. 937, issued by airline tariff Publishing Company, agent filed with the Department of Transportation.

- (F) Time limitations on claims and actions
- (1) No action shall lie in the case of damage to baggage unless the person entitled to delivery complains to an office of carrier forthwith after the discovery of the damage, and, at the latest, within seven (7) days from the date of receipt; and in the case of delay or loss, unless the complaint is made at the latest within twenty-one (21) days for all carriers from the date on which the baggage has been placed at his disposal (in the case of delay) or should have been placed at his disposal (in the case of loss). Every complaint must be in writing and dispatched within the times aforesaid. Where carriage is not "international carriage" as defined in the convention, failure to give notice shall not be a bar to suit where claimant proves that:

Rule 60 Reservations

(A) General

A ticket will be valid only for the flight(s) for which reservation(s) shall have been made, and only between the points named on the ticket or applicable flight coupons. A passenger holding an unused open-date ticket or portion thereof or miscellaneous charges order for onward travel, or who wishes to change his ticketed reservation to another date, shall not be entitled to any preferential right with respect to the obtaining of a reservation.

(B) Conditions of reservations

Reservations shall be tentative unless and until carrier has issued a validated ticket or miscellaneous charges order to the passenger for which space is reserved. Carrier will cancel a reservation at any time without notice on the failure of the passenger to purchase a ticket for the space reserved.

Exception 1: A reservation of space on a given flight is valid when the availability and allocation of such space is confirmed by a reservation agent of the carrier and entered in the carrier's computer.

Exception 2: A reservation or seat request (waitlist) is valid only for the passenger in whose name the reservation or request WAS originally made. Transfer of reservations or seat requests (name changes) from one passenger to another is not permitted. As an exception to such rule, name changes for totally unused 4Y (220-) documents are permitted free of charge for legal name change reasons (for Example: marriage or divorce) provided supporting and eligible documentation will be presented along with such request (e.g.; copy of the respective passport and/or marriage certificate). In the event that such transfer occurs without prior approval of 4Y, 4Y reserves the right to cancel said reservation, waitlisted or requested space.

Exception 3: Subject to payment or satisfactory credit arrangement, a validated ticket will be issued by the carrier indicating such confirmed space provided the

passenger applies to carrier for such ticket before the expiration of the time agreed upon between the carrier and the passenger when the reservation was confirmed. However, if airport ticketing was agreed upon, at least 90 minutes prior to the scheduled departure time of the flight.

Exception 4:

- (a) If the reservation is made within two days of the departure of the flight, the ticket must be issued not later than the times specified below:
- (b) If airport ticketing was agreed upon, at least 90 minutes prior to the scheduled departure time of the flight.
- (c) Such reservation of space is subject to cancellation by the carrier without notice if the passenger has not obtained a validated ticket specifying thereon his/her confirmed reserved space by the time limit agreed upon between the carrier and the passenger.

Exception 5: Carrier may accept reservations of space for specific flights in excess of available space on board the aircraft. The number of excess reservations planned by the carrier for a particular flight is based on the anticipated booking pattern for such flight. The determination of this pattern takes into consideration current conditions which may affect the expected utilization of space on the flight as well as historical factors such as the rate of late cancellations for the flight, failure of persons with confirmed reservations to show for the flight and the absence of any record for certain reservations in the carrier's inventory of the flight.

Exception 6: In the event that the number of persons presenting themselves with confirmed reservations for carriage on a flight exceeds the number of seats available, those passengers with confirmed reservations who are not accommodated will be subject to Rule no. 89, (denied boarding compensation), herein.

(C) Communication charges

The passenger will be charged for any communication expense paid or incurred by carrier for telephone, telegraph radio or cable arising from a special request of the passenger concerning a reservation.

(D) Allocation of accommodations

- (3) Reissue of ticket's that is/are used out of sequence
definition "Out of sequence"
A ticketed coupon of an (already partially flown) Itinerary is not used. This means the processing described below applies in a scenario before and after departure in case the coupon is not used in the booked order.
Example: CAI-FRA-SAO-MUC-CAI itinerary - Cai-FRA not used
CAI-FRA-Sao-MUC-CAI itinerary - MUC-CAI not used or a ticketed coupon of an itinerary was/is/will be used after a subsequent ticketed coupon of the same itinerary.
Example: CAI-FRA-Sao-MUC-CAI itinerary - FRA-SAO and Sao-MUC used, remaining coupons are to be used

thereafter.

Reissue processing for all tickets

This rule applies to all fares any time.

Reissue must be based on the lowest applicable fare in the highest originally ticketed booking class to/from final destination per direction or if no fare is available in the originally ticketed booking class any higher applicable fare. As long as the passenger continues on originally booked flights.

Example: CAI-W/CL-FRA-W/CL-SAO-Q/CL-MUC-Q/CL-CAI

Reissue to FRA-W/CL-SAO-Q/CL-MUC only possible if applicable fare in w/cl and q/cl exists

CAI-W/CL-FRA-W/CL-SAO-Q/CL-MUC-Q/CL-CAI

reissue to FRA-V/CL-SAO-Q/CL-MUC if no applicable fare in w/cl but only in v/cl exists

across pricing units (end-on-end combinations)

CAI-W/CL-FRA-Q/CL-SAO-W/CL-MUC-H/CL-CAI

CAI-FRA/MUC-CAI (pricing unit 1)

FRA-SAO-MUC (pricing unit 2)

Reissue to CAI-Q/CL-FRA// Sao-h/cl-MUC

if applicable booking class is not available, contact carrier for confirmation.

Reissue will always be based on the original ticket issue date (past date pricing) incl BSR applicable at time of original ticket issue date.

All fare conditions including advance purchase of the new applicable fare must be complied with.

For restricted fare (all fares that originally allow changes against charge or do not allow changes at all), collect charge for reissue according to original fare conditions or minimum of EUR 60 for travel within Europe and EUR 190 for all other travel.

In case the passenger requests further changes in and out of sequence itinerary (e.g. Flight date or reroutings), the standard reissue processing applies, i.e. It must be based on actual booking class availability at the time of reissue and performed according to the penalty conditions of the originally ticketed fare.

Originally paid amount is credited towards the payable amount of the reissued fare, though the original non-refundable amount remains non-refundable.

If the new applicable fare is lower than the originally ticketed fare, no refund is granted in case of non-refundable fares. Reissue is mandatory for any case of out of sequence travel.

The passenger is always entitled to refund the old ticket and to purchase a new ticket according to the fare conditions of the respective fare. In this case the new ticket has to be annotated: "Voluntary new purchase due to out of sequence":

Changes that do not fall under the "out of sequence" provisions will be regularly processed according to the penalty conditions of the respective fare.

- (D) Absence, loss or irregularities of ticket
Carrier will refuse carriage to any person not in possession of a valid ticket.  - (3) If a ticket is in fact used by any person other than the person to whom it was issued, with or without the knowledge and consent of the person to whom it was issued, carrier will not be liable for the death or injury of such unauthorized person arising from or in connection with such unauthorized use (see note).
- Note: Except to the extent provided in Rule 55 (liability of carriers), rules affecting liability of carriers for personal injury or death are not permitted to be included in tariffs filed pursuant to the laws of the United States, and this rule is included herein as part of the tariff filed with governments other than that of the United States.

Rule 85 Schedules, Delays and Cancellations

(A) Schedules

The times shown in timetables or elsewhere are approximate and not guaranteed, and form no part of the contract of carriage. Schedules are subject to change without notice and carrier assumes no responsibility for making connections. Carrier will not be responsible for errors or omissions either in timetables or other representations of schedules. No employee, agent or representative of carrier is authorized to bind carrier as to the dates or times of departure or arrival or of the operation of any flight.

(B) Carrier not responsible

Carrier assumes no responsibility for passenger making connections not included as part of the itinerary set out in the ticket. Carrier is not responsible for changes, errors or omissions either in timetables or other representations of schedules. The carrier will not guarantee and will not be held liable for cancellations or changes to flight times that appear on passengers' tickets due to force majeure, including labour disruptions or strikes.

If applicable, a passenger may invoke the provisions of the APPR (in Canada) or of the applicable convention regarding liability in the case of delay.

(B) Delays and cancellations

Part I (EU 261 Applies): Applicable only to flights or portions of flights originating in the EU and terminating in Canada

 - (v) Passengers on free or reduced fares not directly or indirectly available to the public, e.g. ID and ad tickets

- (a) In case of cancellation of a flight the passengers will be entitled to the following:

1500 – 3500	400
Intra EU flights of more than 1500	400
Greater than 3500	600
 - (ii) If an alternative flight is offered and the new scheduled arrival time does not exceed 2 hours versus the originally planned, the compensation amounts shown under (i) above can be reduced by 50 percent:

 - If the value of the voucher exceeds the value of a desired ticket, the difference will not be refunded.

- (3) Long delay

Part II (Canadian APPR applies): Applicable only to flights or portions of flights originating Canada and/or terminating in the Canada

The rules set out in the Canadian APPRs are fully incorporated herein and shall supersede and prevail over any provisions of this tariff which may be inconsistent with those rules.

(1) Applicability

The following rules shall apply:

- (a) In respect of flights departing from an airport in Canada bound to an airport in the European Union (EU), or departing from the EU and bound to an airport in Canada, unless passenger received benefits or compensation and were given assistance in the EU or a third country;
- (b) On condition that passengers have a confirmed reservation on the flight concerned and presents himself/herself for check-in at the time indicated in advance and in writing or electronically; or; if no time is indicated; not later than 60 minutes

- before the published departure time;
 - (c) Only to the passenger traveling with a valid ticket including tickets issued under a frequent flyer or other commercial programme with confirmed reservations and
 - (i) Presents himself at the appropriate place and has observed published minimum check-in times
 - (ii) Has complied with 4Y 's ticketing and reconfirmation procedures
 - (iii) Is acceptable for transportation under the carrier's tariff and the flight for which the passenger holds confirmed reservations is unable to accommodate the passenger and departs without him/her
 - (d) where 4Y is the operating carrier of the flight exceptions:
The following passengers will not be entitled to compensation:
 - (i) Passengers travelling to EU who have received benefits or compensation in the EU or a third country
 - (ii) Passengers travelling between two airports outside of Canada unless the sector is part of a flight (same flight number) that originated in Canada
 - (iii) Passengers without confirmed reservations
 - (iv) Passengers who have not presented themselves for check-in on time
 - (v) Crew members, airline employees or passengers on free or reduced fares not directly or indirectly available to the public, e.g. ID and AD tickets
- (2) when a flight is delayed or cancelled (including before the day of travel), an airline has minimum obligations to passengers. The obligations depend on whether the disruption is:
- (a) within the control of the airline, such as staff issues, aircraft preparation activities, decisions to consolidate flights because of low demand and disruptions due to routine and scheduled maintenance (including any work to address issues found during that maintenance).
 - (b) within the airline's control but required for safety. In this category "required for safety" means "required by law to reduce risk to passengers". Generally, these are situations in which an airline must delay or cancel a flight to follow rules put in place to make sure the flight and people on board are safe. These rules include the Canadian Aviation Regulations and its standards, or
 - (c) Outside the airline's control, such as security incidents, medical emergencies, bad weather or orders from applicable authorities.
- (3) obligations in situations within the airline's control

- (a) Standards of treatment
If 4Y does not notify passengers of a flight disruption at least 12 hours before the scheduled departure time, it will provide passengers with certain amenities, free of charge, when it cancels a flight or when a flight delay reaches two hours. These are described below.
- (i) 4Y will provide a meal voucher and means of communication.
 - (ii) In the event the passenger will wait overnight for the new flight, 4Y will provide a voucher for hotel accommodation in the vicinity of the airport, if the airport is not within a reasonable distance to the passenger's residence.
 - (iii) 4Y may limit or refuse to provide the standards of treatment if doing so would further delay the passenger.
- (b) Alternate travel arrangements
When a flight is cancelled, or once a flight delay has reached three hours, 4Y will offer to make alternate travel arrangements free of charge. The passenger may also choose to continue to wait for their original flight.
- (i) 4Y will provide the passenger with a confirmed reservation on the next available flight operated by 4Y or that is operated by another carrier with which they have a commercial agreement. The new flight:
 - May take any reasonable route out of the same airport to the passenger's final destination; and
 - Must depart within nine hours of the departure time on the passenger's original ticket.
 - (ii) If 4Y cannot meet the obligations in (3)(b)(i) above, it must provide the passenger with a confirmed reservation as soon as possible, on a flight that is operated by any carrier on any reasonable route out of the same airport to the passenger's destination.
 - (iii) If 4Y cannot provide the reservation from the same airport within 48 hours of the original departure time, 4Y will book the passenger from a nearby airport. 4Y will also provide the passenger with transportation to that airport, free of charge.
- (c) Refund
If the alternate travel arrangements an airline offers do not meet the passenger's needs, the passenger is entitled to a refund of the unused portion of the ticket and all unused ancillary charges. However, if the disruption has caused the passenger's travel to no longer serve a purpose and the passenger is no longer at the point of origin on their itinerary, 4Y will provide the passenger with a confirmed reservation back to the point of origin on the ticket and refund the full amount of the ticket.

Refund will be made to the person who purchased the ticket, in the same form of payment the ticket or additional service was purchased. In any other case, 4Y will refund the unused portion of the ticket, including any unused ancillary services that were charged, pursuant to rule 90 (Refunds).

(d) Compensation

- (i) If 4Y informs the passengers 14 days or less before their original departure time, they will compensate the passengers for the inconvenience of the disruption. The compensation is determined by the time of arrival at destination compared to the arrival time on their original itinerary and is as follows:
 - \$400 if the passenger arrives three or more hours late, but less than six hours
 - \$700 if the passenger arrives six or more hours late, but less than nine hours; and
 - \$1000 if the passenger arrives nine or more hours late.
- (ii) Passengers who choose to take a ticket refund instead of alternative travel arrangements must still be compensated for inconvenience. The compensation is \$400.

(e) Responding to a claim

A passenger has one year to make a compensation claim with 4Y from the date the flight delay or cancellation happened. 4Y has 30 days to respond by issuing a payment or saying why it believes compensation is not owed.

- (i) 4Y will offer compensation in monetary form; this can include cash, cheque, bank drafts, and electronic bank transfers.
- (ii) 4Y may offer another form of compensation, e.g., vouchers, but only if:
 - It tells the passenger the monetary amount they are entitled to;
 - The voucher has no expiration date;
 - It tells the passenger in writing the value of the other form of compensation it is offering;
 - The other form is greater in value than the monetary amount the passenger is entitled to;
 - The other form of compensation has no expiry date; and
 - The passenger confirms in writing they know that monetary compensation is available, but they choose the other form of compensation.

(f) Communicating with passengers

4Y will give passengers key information, including the reason for the delay or cancellation, available compensation, standards of treatment, and their rights and options for making a complaint. During flights delays, 4Y will provide regular flight status updates until a new departure time or flight arrangement has been confirmed.

(4) Obligations in situations within the airline's control, but required for safety
If an airline delays or cancels a flight for reasons within its control, but required for safety, it does not have to compensate passengers as defined in section 3(d) above. All other obligations such as rebooking and care referenced above will be provided to the passenger, including section 3(c) Refund.

(5) Obligations in situations outside the airline's control
If an airline delays or cancels a flight for reasons outside its control, it does not have to compensate affected passengers, and the minimum standards of treatment do not apply. However, 4Y will follow the communication requirements described in (3)(f) above. 4Y will also make alternative travel arrangements for passengers as follows.

(a) Alternate travel arrangements
4Y will ensure that the passengers complete their journey. If a flight is cancelled or once a flight delay has reached (3) three hours, 4Y will offer passengers to make alternate travel arrangements for free of charge.

(i) 4Y will provide the passenger with a confirmed reservation on the next available flight operated by 4Y or that is operated by another carrier with which they have a commercial agreement. The new flight:

- May take any reasonable route out of the same airport to the passenger's final destination; and
- Must depart within 48 hours of the end of the event that caused the delay or cancellation.

(ii) If 4Y cannot meet the obligations in (5)(a)(i) above, then 4Y will provide the passenger with a confirmed reservation, on a flight that is operated by any carrier on any reasonable route out of the same airport to the passenger's destination that departs within 48 hours of the original departure time on the ticket.

(iii) If 4Y cannot provide the reservation from the same airport, 4Y will book the passenger as soon as possible from a nearby airport. 4Y will also provide the passenger with transportation to that airport, free of charge.

(b) Refunds

If 4Y cannot provide a confirmed reservation in accordance with section 5(a) above, the carrier will, at the passenger's choice either (a) provide a refund for any unused portion of the ticket, including any unused ancillary services, or (b) if the disruption has caused the passenger's travel to no longer serve a purpose and the passenger is no longer at the point of origin on their itinerary, 4Y will provide the passenger with a confirmed reservation back to the

point of origin on the ticket and refund the full amount of the ticket.

Refund will be made to the person who purchased the ticket, in the same form of payment the ticket or the additional service was purchased, In any other case, 4Y will refund the unused portion of the ticket, or the full ticket in unused, including any unused ancillary services that were charged to rule 90 (Refunds)

In the event that a passenger is rebooked into a lower class of service, a refund of the fare differential will be processed to the passenger's original form of payment, as governed by Rule 90. 4Y will also refund any additional services the passenger purchased if:

 - (a) They do not receive those services on the alternative flight;
 - (b) They must pay for those services a second time.
 - (4) Refund

If the alternate travel arrangements an airline offers do not meet the passenger's needs, the passenger is entitled to a refund of the unused portion of the ticket. However, if the disruption has caused the passenger's travel to no longer serve a purpose and the passenger is no longer at the point of origin on their itinerary, 4Y will provide the passenger with a confirmed reservation back to the point of origin on the ticket and refund the full amount of the ticket.

Compensation is payable within 48 hours or as soon as operationally feasible. Compensation other than cash must be of greater value. If the delay at final destination is greater than expected, compensation has to be adjusted.
- (I) Obligations in situations within the carrier's control, but required for safety
If a passenger is denied boarding for reasons within the carrier's control, but required for safety purposes, no compensation is due. All other accommodations such as rebooking and care referenced above will be provided to the passenger.

The passenger will be refunded the difference between the fare paid from the point of origin to such farther point and the total fare paid, less any applicable charges.
- (4) A penalty for voluntary cancellation shall not apply and the total amount paid shall be refunded if such cancellation is made after an increase in the fare is made applicable between the time of the initial payment and the date of travel.

EUR (if baggage check-in in Europe), JPY(pt 3) (if baggage check-in Japan) or otherwise USD (if baggage check-in in places other than mentioned before). Itineraries to/from the US or Canada do have a different allocation of currency: The currency applicable at the point of commencement of the journey(not the point of baggage check-in will be used to determine the charges for the whole itinerary. Charges may be converted into local currency following this selection of currency rule.

pt 1 - Not applicable for "charges for OAL weight concept (WC)"

pt 3 - Valid where charge is explicitly published in JPY

Bag Selection Criteria

- (1) Origin & destination: To/from the U.S.
US DOT order 2009-9-20 (government reservation to IATA resolution 302)

Background: In July 2012, the United States Department of transportation (US DOT) Rule 399.87 came into effect. Under this rule, all carriers selling transportation to passengers, whose ultimate ticketed origin or destination is in the United States, must apply the same baggage policy and fees throughout a passenger's journey (including the return portion), regardless of the number of baggage check-ins during the journey.

Accordingly, the US DOT requirements stipulate that it is only the first marketing carrier(pt 1) on the first flight segment of an itinerary that has the right to establish the baggage rules (consisting of the free baggage allowance, the dimensions and weight of each of the bags, the level of any charges that may be incurred and carry-on luggage regulations) to apply for the entire journey.

This is irrespective of stopovers or other carrier flights listed on the single ticket. If 4Y is listed on the first flight segment of the ticket, then 4Y baggage regulations will apply throughout the entire journey (pt 2) - both on the outbound and the return flight. Charges, if any, will apply from the point of "baggage check-in" until the next stopover, or the next point of baggage collection. Thus, each time baggage is re-checked by the passenger, the same charges will apply.

However, if 4Y is not the first marketing carrier on the itinerary, such carrier has the right to choose to apply its baggage rules, the rules of the MSC (most significant carrier), or those of any other carrier on the single ticket. In case of itineraries where the first flight is operated on a code-share basis, the rules of the marketing carrier do apply.

Consequently, 4Y cannot guarantee that – though the ticket might have been issued on 4Y ticket stock – the 4Y baggage rules will apply in such cases. Other airlines often have baggage rules which differ from those of 4Y .

- (2) Origin & destination: to/from Canada
CTA decision no. 144-a-2014 (government reservation to IATA resolution 302)
- (a) Applicability
Paragraph (2) is applicable to all interline itineraries issued on a single ticket whose origin or ultimate ticketed destination is in Canada. It establishes how the carrier will determine which carrier's baggage rules apply to any passenger's entire interline itinerary.
 - (b) General
For the purposes of interline baggage acceptance:
 - (i) The carrier whose designator code is identified on the first segment of the passenger's interline ticket will be known as the selecting carrier.
 - (ii) Any carrier who is identified as providing interline transportation to the passenger by virtue of the passenger's ticket will be known as a participating carrier.
 - (c) Baggage rule determination by selecting carrier
 - (i) Checked baggage
The selecting carrier will:
 - (aa) Select and apply its own baggage rules as set out in its tariff to the entire interline itinerary or;
 - (bb) Select the most significant carrier, as determined by IATA resolution 302 and conditioned by the Canadian transportation agency, in order for that carrier's baggage rules, as established in its tariff, to apply to the entire interline itinerary. The carrier identified by means of (aa) or (bb) will be known as the selected carrier.
 - (ii) Carry-on baggage
Each operating carrier's carry-on baggage allowances will apply to each flight segment in an interline itinerary. Notwithstanding, the carry-on baggage charges that will apply to the entire interline itinerary will be those of the selected carrier.
 - (iii) Where the carrier is not the selected carrier on an interline itinerary but is a participating carrier that is providing transportation to the passenger based on the ticket issued, the carrier will apply as its own the baggage rules of the selected carrier throughout the interline itinerary.
 - (d) Disclosure of baggage rules

Summary page at the end of an online purchase and e-ticket disclosure

- (i) For baggage rules provisions related to a passenger's 1st and 2nd checked bag and the passenger's carry-on baggage (i.e., the passenger's "standard" baggage allowance), when the carrier sells and issues a ticket for an interline itinerary, it will disclose to the passenger on any summary page at the end of an online purchase and on the passenger's itinerary/receipt and e-ticket at the time of ticketing the baggage information relevant to the passenger itinerary as set out in paragraph (ii) below. The disclosed information will reflect the baggage rules of the selected carrier.
- (ii) The carrier will disclose the following information:
 - (aa) Name of the carrier whose baggage rules apply;
 - (bb) Passenger's free baggage allowance and/or applicable fees;
 - (cc) Size and weight limits of the bags, if applicable;
 - (dd) Terms or conditions that would alter or impact a passenger's standard baggage allowances and charges (e.g. Frequent flyer status, early check-in, pre-purchasing baggage allowances with a particular credit card);
 - (ee) Existence of any embargoes that may be applicable to the passenger's itinerary; and,
 - (ff) Application of baggage allowances and charges (i.e., whether they are applied once per direction or if they are applicable at each stopover point).
- (iii) The carrier will provide this information in text format on the passenger's e-ticket confirmation. Any fee information provided for carry-on bags and the first and second checked bag will be expressed as specific charges.

web site disclosure

The carrier will disclose on its website, in a convenient and prominent location, a complete and comprehensive summary of all of the carrier's own baggage rules, including information concerning:

- (a) The maximum weight and dimensions of passenger bags, if applicable, both checked and unchecked;
- (b) The number of checked and unchecked passenger bags that can be transported and the applicable charges;
- (c) Excess and oversized baggage charges;
- (d) Charges related to check in, collection and delivery of checked baggage;
- (e) Acceptance and charges related to special items,

- e.g. Surfboards, pets, bicycles, etc.;
 - (f) Baggage provisions related to prohibited or unacceptable items, including embargoes;
 - (g) Terms or conditions that would alter or impact the baggage allowances and charges applicable to passengers (e.g. Frequent flyer status, early check in, pre-purchasing baggage allowances with a particular credit card); and,
 - (h) Other rules governing treatment of baggage at stopover points, including passengers subject to special baggage allowances or charges, etc.
 - (3) Origin & destination: Any other origin or destination (except to/from the U.S./Canada)
IATA resolution 302(pt 1)
Background: Recognizing the industry requirement for more flexible baggage allowance and fees, on April 1, 2011, IATA resolution 302 came into force which sets out a new methodology to determine which carrier's baggage rules would apply in the case of any given journey, whether via an interline or code-share arrangement. Such new rule is based on the most significant carrier (MSC) approach to baggage allowance and charge determination and defines which airline's baggage rules would apply with respect to both allowance (i.e. Number of free pieces, size, weight, etc.) and charges (baggage fees and excess baggage fees).
The MSC shall be determined in the following order.
 - 1) The marketing carrier crossing from one TC area to another, or otherwise(pt 2)
 - 2) The marketing carrier crossing from one TC sub-area to another sub-area, or otherwise
 - 3) The marketing carrier performing the first international sector within a TC sub-areaMSC rule applies on each portion of an itinerary where baggage is through checked (from where a passenger checks a bag to the point the passenger collects the bag). Baggage rules of the MSC are applicable from the point of "baggage check-in" until the next stop-over, or the next point of baggage collection. Thus, each time baggage is re-checked by the passenger, a MSC is once again defined and such MSC's baggage rules do apply.
- pt 1 - not applicable to/from the United States or Canada
- pt 2 - Exception: For itineraries from tc1 to TC 3 (via tc2): First carrier on the Transatlantic portion

General Baggage Conditions

- (1) Free baggage allowance
In case 4Y determines the free baggage allowance (FBA) of a journey, the piece concept of 4Y applies per checked portion of the baggage (Note: Exception may apply to/from the U.S. And Canada)
The FBA shall always be handled as shown on the respective ticket or the passenger receipt .
A passenger may carry some baggage free of charge, subject

to 4Y conditions and limitations which are mentioned in the ticket and according to the terms of 4Y . The weight of each piece of baggage must not exceed 32 kg.

- 2) Excess baggage
In case of baggage in excess of the free allowance a passenger has to pay the charges as published by 4Y and a pre-reservation is mandatory.
- (3) Checked baggage
Checked baggage will be accepted according to the general conditions of carriage which can be found on www.EUROWINGS.com under terms & conditions.
- (4) Unchecked baggage (carry-on baggage)
In addition to the checked baggage allowance, each passenger may carry, without additional charges, carry-on baggage suitable for placement in the closed overhead rack or under the passenger's seat.
If baggage cannot be stored by this means or exceeds the limitations in regards of weight, size and number or is considered unsafe for any reason, it must be checked as checked baggage in the cargo compartment.
- (5) For Canada only – any excess to baggage fees or ancillary charges charged but not used, or charged a second time due to alternate travel arrangements, will be refunded pursuant to Rule 90 (Refunds).

Tariff: 4Y1
Carrier: EW Discover – 4Y

CTA No. 573 DOT No. 937

Rule 130 Fares

(A) General

The mileage routings or specified routing contained in this tariff shall apply only when transportation between the last point of departure in the area comprising Area 1 and the first point of arrival outside such area, or vice versa, is via the service of 4Y unless otherwise prohibited by said tariff. Fares apply only for carriage from the airport at the point of origin to the airport at the point of destination and do not include ground transfer service between airports and city centers except where Rule 30 specifically provides that such ground transfer service will be furnished without additional charge.

(B) Applicable fares

(1) Fare construction definitions

(a) One way trip/one way subjourney

Part of a journey where travel from one country does not return to such country and for which the fare is assessed as a single pricing unit using a one way fare.

(b) Round trip

(i) The term "round trip" is equivalent to a return journey and means travel entirely by air from a point to another point and return to the original point comprising two half round trip fares components only, for which the applicable half round trip fare for each fare component, measured from the point of unit origin, is the same for the routing travelled; provided that this definition shall not apply to round the world travel if the fares to be used differ through class of service/seasonality/day-of-week/carrier variations, the outbound fare shall be used also for the inbound fare component for the purpose of determining if the pricing unit is a round trip.

(ii) When a round trip ticket is purchased prior to commencement of carriage, the fare for such trip will be the round trip fare published for the desired routing and the class of service used. If no round trip fare is published, the applicable fare will be the sum of the one way

fares published for the segments of the desired routing and for the class of service used. When transportation is partially via fares governed by this tariff and partially via fares published in other tariffs, 50 percent of a round trip fare governed by this tariff may be combined with 50 percent of a round trip fare published in other tariffs to construct a through round trip or circle trip fare provided that:

- (aa) fares which, by their own terms, are not combinable with other fares, shall not be used in the construction of round trip fares;
 - (bb) this provision will not apply when any part of the round trip is via the services of a nonscheduled carrier or on a charter or military flight.
 - (cc) the most restrictive provisions applicable to any fare used in the construction will apply to the entire trip.
- (c) circle trip
- (1)
 - (2) circle trip - travel from a point and return thereto by a continuous, circuitous air route, including travel comprising only two fare components but which do not meet the conditions of the round trip definition.
 - (a) Applicable fare for a circle trip shall be the lowest combination of half round trip fares in the direction of travel along respective sections involved in the trip, beginning the calculation from the point of unit origin of the trip; provided that for any fare component which terminates in the country of unit origin, the fare applicable to such fare component from the country of unit origin shall be used.
 - (b) (1) The applicable fare for a circle trip (excluding any side trip which has been charged as a separate pricing unit) shall not be less than the direct route normal or special round trip fare, as

- appropriate, for the highest rated pair of points applicable to the class of service used from the point of unit origin to any stopover point on the route of travel.
- (2) (i) The foregoing provisions shall not apply to local combinations of normal and special fares.
- (ii) When there are round trip fares with different global indicators from the point of unit origin to any stopover point, the fare to be used for the check must be that applicable to the flown itinerary.
- (iii) When the flown itinerary incorporates such different global indicators (including round the world travel), the fare must not be less than the lower of such round trip fares from the point of unit origin provided that, only direct route fares between two points with the appropriate global indicators shall be used, if there is no direct route fare with the appropriate global indicators or there is no global indicator for the routing, it is not necessary to construct such fares.

 - (3) when there are round trip fares from the point of unit origin to any stopover point which differ according to carrier(s) used outbound and inbound, the fare to be used for check shall be the lower of such round trip fares.
 - (4) where more than one normal fare is published for the carrier(s) and the class of service used, the lower, lowest level may be used subject to seasonality (including black out dates) and day of week application.
 - (5) For round the world travel originating in Australia/New Zealand the provisions of subparagraph (b)(1) and (2) shall not apply.
 - (6) when checking the circle trip minimum fare, when special fares are used the comparison shall be as provided the subparagraph for hip checks in this rule.
 - (7) The foregoing provisions need not be applied for points which have been excluded from the higher intermediate point rule, subject to the same conditions contained in the exclusion.
 - (8) Special fare only: the foregoing

- provisions need not be applied for points which have passed the hip check and have not qualified to be a hip point.
- (d) Partly via air and partly via sea
(Applicable to round trip and around the world fares.) When tickets are purchased prior to commencement of carriage for a round trip or around the world journey for combined air and sea travel, the air fare for each one way section of the air journey will be 50 percent of the all year round trip fare published in tariffs governed by this tariff and applicable between the points and via the class of service used. A break in the round trip is permitted to allow passengers to make their own way by any means of transportation between airports and adjacent seaports.
 - (e) Around the world fares
Circle trip fares which apply to continuous EB or WB travel via both the Atlantic or Pacific, commencing and returning to the same point.
 - (f) Open jaw trips
 - (i) Normal fare open jaw
Travel from one country and return thereto, comprising two international fare components only and where.
 - (aa) The outward point of departure in the country of unit origin and the inward point of arrival in the country of unit origin are different (origin open jaw)
 - (i) Only domestic surface sectors are permitted.
 - (bb) The outward point of arrival and the inward point of departure are different (turnaround open jaw)
 - (i) Both international and domestic surface breaks are permitted.
 - (ii) When the surface sector is an international sector the distance of such surface sector must not be greater than the flown distance of the longer of the two fare components.
 - (cc) The outward point of departure in the country of unit origin and the inward point of arrival in the country of unit origin are different (origin jaw) and the outward point of arrival and the

inward point of departure are different (turnaround open jaw)

- (i) Combination of an origin open jaw and a turnaround open jaw with a domestic surface sector.
- (ii) Combination of an origin open jaw and a turnaround open jaw with an international surface sector.
- (dd) The fare for a normal open jaw pricing unit shall be the sum of half the applicable round trip fares for both international leg of the open jaw, provided that when a fare component terminates in the country of unit origin, the fare applicable from the country of unit origin shall be used.

Note:

For the purpose of a normal open jaw Canada, USA shall be considered as one country; except for pricing units wholly within Scandinavia, Scandinavia

shall be considered as one country; Aruba, Bonaire, St. Eustatius, Saba, Curacao, St. Maarten shall be considered as one country; except for pricing units wholly within Europe, Europe shall be considered as one country.

- (ii) Special fares open jaw
Except as otherwise specified in a fare rule, the fare for a special fares open jaw shall be the sum of half the applicable round trip fares for both legs of the open jaw; provided that when a fare component terminates in the country of unit origin, the fare applicable from the country of unit origin shall be used.

Exception: For travel originating and terminating in Europe (except for travel wholly within Europe: where an open jaw applies between countries in Europe, the fare component which terminates in Europe shall be assessed in the direction from Europe.

- (g) Side trip
A side trip is defined as travel from and/or to an enroute point of a fare component and which will be a separately charged air

- fare(s) that interrupts a through international fare.
 - (h) Surface sectors
 - (i) Imbedded surface sector
Imbedded surface sector means a domestic or international surface sector within a fare component but not to or from a fare Construction point. Imbedded surface sectors are allowed in any itinerary at the passenger's request unless restricted in a specific fare rule.
 - (ii) Fare construction surface sector
Fare construction surface sector means either the origin point or the terminal point of a domestic or international surface sector is at a point of turnaround or destination of a pricing unit. Fare construction surface sectors are allowed in any itinerary at the passenger's request unless restricted in a specific fare rule. A fare Construction surface sector from the point of origin of a PU shall not be permitted. A fare construction surface sector at the beginning or end of the journey shall not be permitted. Origin of a PU shall not be permitted.
 - (i) special area definitions
Each of the following areas will be considered one country, for the purpose of fare construction;
 - (i) Canada, U.S.A. are considered one country
 - (ii) Denmark, Norway, Sweden are considered one country
- (C) Applicable fares
- (1) Except as provided in (D)(1) below, where a fare is published via the desired routing from point of origin to point of destination, such fare is applicable over such route notwithstanding that it is higher or lower than the combination of intermediate fares of the same type via the same routing. For the purpose of this rule, a published fare includes a fare obtained by combining a published arbitrary and a published international fare.
 - (2) Where no through fare is specifically published for a desired itinerary, for the class of service used, it must be constructed. Such constructed fares must not be less than the lowest amount obtained by combining two or more sectional fares along the desired routing which produces the lowest fare.

- (3) Fares must be used directionally outbound until the component which returns to the country of international travel origin. The fare for such component will be applied directionally from the country of origin. For fares assessed on side trips, the point of fare interruption will be considered as the point of origin for determining the fare directionally of the separately assessed side trip components.
 - (4) All published fares governed by this tariff and all fares constructed in accordance with this tariff are applicable only when in compliance with all the provisions governing travel as stated herein. Mileage routings (see maximum permitted mileage tariff no. MPM-1 C.A.B. No. 424.
May be applied to any published or constructed fare; however, if a diagrammatic or linear routing is specified in connection with a fare, such routings must be observed for that portion of the transportation covered by that fare.
 - (5) The fare paid shall only be applicable when international travel commences in the country of the point of origin shown on the ticket, i.e. If international travel actually commences outside the country of the ticketed point of origin, the fare must be reassessed from the point where international travel actually began. For example, if a ticket is purchased at the swiss francs fare for travel between Zurich-Frankfurt-New York and the passenger actually commences travel in Frankfurt instead of Zurich, the fares must be reassessed at the Frankfurt-New York, Euro level.
 - (6)
- (D) Construction of fares
- (1) Combinations
fares may be combined with other fares, provided that such fares permit combinability.
 - (a) Unless otherwise stated in a particular fare rule, half of a round trip fare governed by one rule must not be combined with half of another round trip fare governed by a different rule in order to construct a different type of round or circle trip fare.
 - (b) Special round trip fares must not be used for Construction of around-the-world fares, nor must one-half of a round or circle trip special fare be used to construct another type of round or circle trip special fare.
 - (c) When constructing open jaw or circle trip special fares involving cities with different conditions, (advance purchase requirements, minimum/maximum stay, cancellation penalty)

- The most restrictive conditions govern the entire journey.
- (d) Unless otherwise stated in an applicable fare rule, when combining special fares with other types of fares, the restrictive provisions of the special fare apply only to special fare and not to any other fare used in combination.
 - (e) Combinations with other fares must not extend the validity period.
- (2) Combining domestic U.S.A. Fares with international fares
- (a) Domestic U.S.A. Fares
a normal fare applicable within the U.S.A. May be combined end-on-end with an international fare to construct a through fare, which is less than the published international through fare from point of origin to point of destination, provided travel is via the fare construction points.
 - (b) Domestic U.S.A. Special fares
 - (i) A special fare applicable within the U.S.A. May be combined with any international fare to construct a through fare, which is less than the published fare from point of origin to point of destination, provided that the passenger complies with all conditions (e.g., period of validity, minimum/maximum stay, advance purchase requirements, group size, etc.) of the special fare.
Exception: Any minimum tour price required by the special fare within the U.S.A. will not be applicable when that fare is combined with an international inclusive tour fare having a minimum tour price of the same or higher amount.
 - (ii) Passengers traveling under a fare constructed in (i) above may be routed via any gateway city regardless of the fare construction point(s), subject to the routing conditions governing the international fare.
 - (iii) When a mileage routing applies to the international fare, mileage routings provided for (see maximum permitted mileage tariff no. MPM-1, C.A.B. No. 424, NTA(A) no. published by airline tariff Publishing Company, agent) may be applied to a fare constructed under (i)

- Above either for the entire journey between the point in the U.S.A. And the point in Area 2 or 3, or between a U.S.A. Gateway and the point in Area 2 or 3.
- (3) Combining arbitraries with international fares. Between a point in Area 1 and a point in Area 2 or 3, the fare for such transportation will be established by combining the published arbitrary and the published international fare for the fare class applicable to the transportation. The passenger may be routed via any gateway city regardless of the point(s) used in establishing the fare, subject to the provisions of (c) above. In case a specified fare is published for the desired itinerary and a combination of arbitraries would be possible as well as the specified fare always take precedence.
 - (4) Surface transportation segments
 - (a) Surface transportation due to lack of reasonably direct air service
 - (i) When no reasonably direct scheduled air service is available between two points of a circle trip, a break in the circle may be travelled by any other means of transportation without changing the status of the circle trip.
 - (ii) A break in the circle trip is not permitted within a fare component when applying the mileage system. The break may only appear between two fare components if the circle trip status is to be retained.
 - (b) Itineraries containing both air and surface transportation segments. When a journey by air is interrupted by the use of surface transportation between points not listed in sub-paragraph (c) below, the fare should be constructed by whichever of the following methods produces the lowest fare:
 - (i) The sum of two or more applicable one way fares.
 - (ii) A one way, round or circle trip fare covering all portions of the itinerary whether travelled by air or surface transportation.
 - (iii) A round or circle trip fare for that portion of the itinerary which meets the requirements of a round or circle trip plus one or more one way fares for those portions not included in the round or circle trip fare.
 - (c) Permissible surface transportation sectors

- (i) When an itinerary includes surface transportation between certain intermediate points, the mileage between such intermediate points may be disregarded when computing sector mileages.
 - (ii) The exclusion of these mileages will not affect the status of a round or circle trip.
 - (iii) These sectors may not be used as points of origin/destination.
 - (iv) When routing itinerary includes surface transportation between intermediate points, one of the intermediate points may be disregarded, and the through fare shall be applied.
- Exception: Permissible surface transportation sectors

- (5) Mileage system
The maximum permitted mileage (MPM) published in connection with a fare governs the maximum distance a passenger is allowed to travel EN route between two particular points at the direct through one way or half round trip fare. In order to determine whether a desired routing between two points is permissible at the through one way or half round trip fare, the following steps should be taken;
- (a) Determine the applicable MPM between the terminal points of the fare.
 - (b) Add up the ticketed point mileages (TPM) Between the cities on the itinerary, including all intermediate ticketed points, and fictitious construction points. Intermediate points of through flights are not taken into account when computing mileages. The ticketed point mileages to be used to determine the actual mileage for the itinerary are those published in the International Air Transport Association

ticketed point mileage manual.

Note: "ticketed points" are shown in the "good for passage" section of a passenger ticket, plus any other points used for fare construction shown in the fare construction box. Two flight numbers or two carriers (such as an interchange flight) are not permitted on the flight coupon.

- (i) If on a through fare, a portion of the journey is to be traveled by means of surface transportation, the direct or lowest combination of currently published ticketed point mileages is to be used, whether or not air services exist over such sectors.
- (ii) Limitations on indirect travel a fare component must not include more than one departure from fare component origin or more than one arrival at fare component destination or more than one stopover at any one intermediate ticketed point.

Additionally,

- (aa) A fare component within tc1 or within tc31 must not include more than one arrival and one departure at any ticketed point.
- (bb) For a journey originating in tc1 no fare component within tc1 may include more than one international departure and one international arrival at any ticketed point in the country where travel originates.

Example:

POA-BUE-Sao-NYC - through fare not permitted because of two international departures from Brazil.

- (cc) Except for journeys wholly within South America for a pricing unit originating in Brazil, a fare component from a point in Brazil must not include more than two domestic sectors in Brazil.

Examples:

1. BSB-RIO-NYC at a through fare BSB-NYC is

- permitted.
2. POA-RIO-SSA-LIS at a through fare POA-LIS is permitted.
 3. FLN-X/CWB-IGU-X/Sao-LON at a through fare FLN-LON is not permitted. The first international fare component must be assessed from CWB and FLN-CWB charged separately.
- (dd) For a pricing unit originating in Germany a fare component from/to a point in Germany must not include more than two domestic sectors in Germany.
- (ee) A fare component from/to/via Japan must not include more than three domestic sectors in Japan.
- (iii) Extra mileage allowances are permitted in certain markets in addition to the published MPM's; however, only one extra mileage allowance is permitted in connection with a one way or half round trip fare. Extra mileage allowances apply only in connection with the through fares between the points or areas specified, and the route of travel, including scheduled stopovers, intermediate transit points and connecting point(s), must be ticketed via the point(s) specifically indicated. The extra mileage allowance should be deducted from the sum total of the TPM's before making the comparison between this total and the applicable MPM's.

(iv) Polar route mileage computation must be applied when an itinerary includes a flight between Europe and Japan/Korea via Area 1 on any routing which does not touch a point in North America south of 60 degrees North latitude.			
(aa) when a Europe-Japan/Korea polar flight is included in the itineraries between points in area 1 and points in Japan/Korea, the regular fares and maximum mileages			

- appropriate to travel via the Atlantic should be applied. TPM's should be calculated over the actual route of travel.
- (bb) When an itinerary involving Polar Route travel extends to points beyond Japan/Korea, the TransAtlantic fare must be broken over Fukuoka/Nagoya/Osaka/Seoul/Tokyo and then combined with an appropriate fare in accordance with the lowest combination principle.
Note: When a Europe-Japan/Korea polar flight is included in an around the world itinerary, apply the Construction principles in (c)(6), below.
- (c) Compare the total TPM's to the applicable MPM permitted at the direct fare between the two points. If the total TPM's is equal to or less than the MPM, the itinerary is allowed at the published direct fare.
- (d) If the total TPM for a desired routing exceeds the MPM published in connection with a fare, a surcharge becomes necessary.
Note: If a surcharged fare exceeds a combination of sector fares, such combination of fares may be used provided it is not less than the unsurcharged direct fare between the points of origin and destination.
where the sum of the ticketed point mileages for the routing option is greater than the maximum permitted mileage the direct route fare shall be surcharged in accordance with the following formula:
Divide the sum of the ticketed point percentage the mileages by the maximum permitted fare shall be mileage.
- | If the result is: | Surcharged by: |
|--|----------------|
| Over 1.00 but less than or equal to 1.05 | 5 |
| Over 1.05 but less than or equal to 1.10 | 10 |
| Over 1.10 but less than or equal to 1.15 | 15 |
| Over 1.15 but less than or equal to 1.20 | 20 |
| Over 1.20 but less than or equal to 1.25 | 25 |
- (e) If the sum total of TPM exceeds the adjusted MPM shown at 25 percent in the excess mileage percentage table, the applicable fare will be the combination of two or more fares along the desired

- routing which produces the lowest fare.
- (6) Travel via a higher-rated intermediate point
- (a) Normal fares
except as provided in 6(c)(f) below, a through fare between origin and destination must not be lower than:
- (i) The normal fare between the point of origin and any intermediate stopover point along the routing;
- (ii) The normal fare from each intermediate stopover point to each subsequent fare break point.
- (iii) The normal fare from any intermediate stopover point to each subsequent stopover point along the routing.
- (iv) When the direct normal through fare is lower than any of the fares applicable fares checked under (i) To (iii) above, the direct normal fare must be raised to the highest of any such intermediate point normal fares.
- (v) When the total of TPM's for an itinerary exceeds the MPM, the normal fare must be surcharged in accordance with the procedures for excess mileage surcharges. If the routing passes through a higher intermediate ticketed point, the appropriate fare to be surcharged is the normal fare between the origin and destination of that segment which has been raised to the level of the higher intermediate ticketed point normal fare.
- (vii) All conditions of the normal fare between origin and destination apply.
- (b) Special fares (except as provided in 6(c)-(f) below)
- (i) If there is no higher normal fare between:
- (aa) The point of origin and any intermediate stopover point; or
- (bb) From any intermediate stopover point to each subsequent stopover point/fare break point along the routing the special fare (surcharged, if necessary) applies between origin and destination.
- (ii) If there is a higher normal fare between the points checked under (i)(aa) and

- (i)(bb) above:
- (aa) The special fare must be raised to the level of such higher normal fare (surcharged, if necessary), unless;
 - (bb) The same or lower special fare of the same type exists between such points, in which case the special fare (surcharged, if necessary) Applies;
 - (cc) A higher special fare of the same type exists between such points, in which case such higher special fare (surcharged, if necessary) Applies.
- (iii) When comparing special fares, fares of the same type must be used and shall mean the same class of service, the same seasonal application and the same general conditions. In defining a fare of the same type, the comparison shall be limited to the class of service and:
- | Column 1 | Column 2 | Column 3 |
|-------------------|------------------|-------------------------|
| Unreserved Normal | Excursion Budget | Promotional fare of the |
| Reserved Normal | Instant Purchase | same fare type. |
| | OW APEX | |
| | RT APEX | |
- when fares are not available for the same fare type in Column 2, the component should be repriced at the next higher fare type shown in Column 2.
- Note 1: Ticket validity and minimum/maximum stay requirements need not be the same.
- Note 2: In case there is more than one special fare of the same type for comparison on any given sector, the fare with the conditions most similar to those of the special fare between the terminal points should be used for comparison.
- If from the origin ticketed point to any intermediate stopover point there is no special fare of the same type as the through special fare, the fare shall not be less than the lowest of any higher type of special or normal fare in the absence of a special fare, in the same class of service.
- (c) Higher Intermediate Point checks will apply

as follows:

- (1) Normal fares
 - (a) If in any routing otherwise permissible at the direct route normal fare, there is a direct route normal fare(s) of the same class of service from
 - (i) Fare component origin to each subsequent intermediate stopover point
 - (ii) Each intermediate stopover point to each subsequent intermediate stopover point
 - (iii) Each intermediate stopover point to the subsequent fare break point which is higher than the direct route normal fare between the fare construction points, the fare shall not be less than the highest fare referred to above (hip). In the case of fares which are established by season (including blackout dates) or day of week, or flight application the check will be based on the applicable fare (by seasonality including blackout dates; or by day of week or by flight application).
 - (b) If in any indirect routing otherwise permissible at the direct route normal fare plus a percentage (EMS), there is a direct route normal fare(s) of the same class of service involving points as specified in (a),(i),(ii),(iii) above which is higher than the direct route normal fare between the fare construction points, the fare for the indirect route shall not be less than the highest fare referred to above (hip), and the mileage surcharge percentage (EMS) applicable to the through fare shall be applied to such higher intermediate fare.
 - (c) When comparing normal fares of the 'same class of service' in order to determine if there is a higher intermediate fare, the following sequence shall be followed:
 - (i) Sleeper seat fare is compared

- with sleeper seat; if no sleeper seat fare, compare with the highest first class fare ignoring any fare rule provision.
- (ii) First class fare is compared with first class (provided that where more than one first class fare is published, compare with the highest first class); if no first class fare, compare with the highest intermediate/ business class fare (or next lower class fare) ignoring any fare rule provisions.
- (iii) Intermediate/business class fare is compared with intermediate/ business class fare; if no intermediate/business class fare, compare with the highest premium economy class fare; (or next lower class fare).
- (iv) Premium economy class fare is compared with premium economy class fare. If no premium economy class fare, compare with the highest economy class fare, ignoring any fare rule provisions.
- (v) Economy class fare is compared with economy class fare; if no economy class fare to compare, no check is required.
- (d) When comparing normal fares in accordance with the foregoing, the comparison shall be made in the same direction as the fare component. When using half round trip fares the comparison shall be made using half round trip fares. When using one way fare the comparison shall be made using one way fares.
- (e) Where more than one normal fare is published for the carrier and the class of service used, the lower/lowest level may be used subject to any stopover, transfer, seasonality (including blackout dates), flight application, routing validation, day of week limitations, of the lower/lowest

- fare (excluding application of the stopover charges).
- (f) When a ticket shows no stopover at both the unit origin and the unit destination point of a side trip which has been charged separately (due to transfer connections on both occasions) a stopover shall be considered to be taken at such point unless the time interval between the arrival immediately preceding the side trip and the departure immediately following the side trip does not constitute a stopover as defined in resolution 012.
 - (g) When there is an imbedded surface sector the hip check applies to the point of arrival by air immediately preceding the surface sector and to the point of departure immediately following the surface sector, unless the time interval between the arrival and departure does not constitute a stopover as defined in resolution 012, however, such check shall not apply between the terminal points of the unflown sector.
 - (h) When there is a fare construction surface sector, the hip check applies to the point of such surface sector that is not the fare Construction point unless the time interval between the arrival and departure at such point does not constitute a stopover as defined in resolution 012; however, such check shall not apply between the terminal points of the unflown sector.
 - (i) Notwithstanding the above
 - (aa) For journey originating in western Africa, the hip check in each fare component shall be applied on all ticketed points in western Africa.
 - (bb) For journey wholly between Kilimanjaro and Nairobi, the hip check in each fare component shall be applied on all ticketed points.
 - (cc) For journeys originating in Malawi, the hip check in each

- fare component shall be applied on all ticketed points in Malawi.
- (j) Day-of-week-application in establishing the day-of-week fare level to be used for the hip check the rule for the application of the day-of-week fares AHLL be applied solely to the sector(s) for which the check is being made. The day of travel on such sector(s) shall be used to determine the day of week fare level to be used for the hip check
- Example:
Routing: GVA-FRA-CAI-AMS-GVA
first fare component (GVA-CAI)
Fare GVA-CAI is established using the day of week of the first international sector GVA-FRA
fare GVA-FRA is a non-day-of-week fare
there are day-of-week fares FRA-CAI with the rule that the first international sector determines the day of the week fare to be applied to established the day-of-week fare level to be used for the hip check on the sector FRA-CAI the date of travel FRA-CAI will be used
second fare component (fare in the direction from GVA-CAI)
Fare GVA-CAI is established using the day of the week of the first international sector GVA-AMS.
Note: The first international sector is taken in the direction of the fare component
fare GVA-AMS is a non-day-of-week fare
there are day-of-week fares AMS-CAI with the rule that the first international sector determines the day-of-week fare to be applied to establish the day-of-week fare level to be used for the hip check on the sector CAI-AMS the date of travel CAI to AMS will be used.
- (k) In establishing the seasonal fare

level to be used for the hip check the rule for the application of the seasonal fares shall be applied solely to the sector(s) for which the check is being made. The seasonal rule for such sector shall be used to determine the seasonal fare level to be used for the hip check. Where reference in a seasonal rule is to a specific segment of travel, e.g. First international sector, the specific segment shall be assessed within the sector(s) for which the hip level is being established.

Example:

Routing a-b-c-b-a

first fare component (a to c)

Fare a-c is a non-seasonal fare

fare a-b is a non-seasonal fare

there are seasonal fares b-c with

the rule that the first

international sector determines

the seasonal fare to be applied

to establish the seasonal fare

level to be used for the hip

check on the sector b-c the date

of travel b to c will be used

second fare component (fare in

the direction from a to c)

Fare a-c is a non-seasonal fare

fare a-b is a non-seasonal fare

there are seasonal fares b-c with

the rule that the first

international sector determines

the seasonal fare to be applied

to establish the seasonal fare

level to be used for the hip

check on the sector c-b the date

of travel c to b will be used.

(2) Special fares

(a) If any routing otherwise

permissible at the direct route

special fare there is a direct

route special fare(s) of the same

class of service from.

(i) Fare component origin to each intermediate stopover point.

(ii) Each intermediate stopover point to the fare component destination which is higher than the direct route special fare between the fare construction points, the fare

- shall not be less than the highest applicable fare referred to above (hip).
- (b) If any indirect routing otherwise permissible at the direct route special fare plus a percentage (EMS), there is a direct route special fare(s) of the same class of service involving points as specified in (a) (i) and (ii) Above, which is higher than the direct route special fare between the fare construction points, the fare for the indirect route shall not be less than the highest applicable special fare referred to above (hip), and the surcharge percentage (EMS) applicable to the through fare shall be applied to such higher intermediate fare.
- (c) The sequence described below shall be followed for each sector indicated in (a) (i) and (ii) above.
- (aa) The special fare of the fare component shall not be less than the lower/lowest applicable special fare of the same fare type.
- (bb) If there is no matching applicable special fare of the same type, the special fare of the fare component shall not be less than the lower/lowest applicable special fare within the same fare type group.
- (cc) If there is no applicable special fare within the same fare type group, the special fare of the fare component shall not be less than the lower/lowest applicable special fare within the next higher fare type group. Continue to the next group only if there is no applicable special fare found.
- (dd) If there is no applicable special fare within any higher fare type group, the direct route special fare, surcharged if necessary,

should be used.

Note: The conditions which define "applicable fare" are listed in resolution 012c (hip). Any stopover/transfer charges which apply to an intermediate stopover point are excluded.

- (d) In defining a "special fare of the same fare type group", the comparison shall be from the lowest to the highest of the following fare type groups:

Fare type groups

Column 1	Column 2	column 3	column 4
(a) APEX fare or,	(a) GIT fare, or	public group	status fare

Note: if no status fare of the same fare type is found, no hip will apply

(b) instant purchase/PEX fare, or	(b) individual IT fare
(c) excursion fare, or	
(d) all other individual special fares (except status, IT fares)	

- (E) All conditions attached to the special fare for the fare component will apply.
 Exception: Hips will not be checked when routing fares are used.

- (F) when comparing special fares in accordance with the foregoing, comparison shall be made with the following provisions.
- (i) In the same direction as the fare component.
 - (ii) Half round trip fare(s) compared to half round trip fare(s); one way fare(s) compared to one way fare(s).
 - (iii) Limited to their same class of service
 - first class fare is compared with first class fare;
 - intermediate/business class fare is compared with intermediate/business class fare.
 - Premium economy class fare is compared with premium economy class fare.
 - Economy class fare is compared with economy class fare.
 - (g) when the ticket shows no stopover at both the unit origin and the unit destination point of side trip which has been charged separately (due to transfer connection points on both occasions) a stopover shall be considered to be taken at

- such point unless the time interval between the arrival immediately preceding the side trip and the departure immediately following the side trip does not constitute a stopover as defined in resolution 012.
- (h) When there is an imbedded surface sector the hip check applies to the point of arrival by air immediately preceding the surface sector and to the point of departure immediately following the surface sector, unless the time interval between the arrival and the departure does not constitute a stopover as defined in resolution 012. However, such check shall not apply between the terminal points of the unflown sector.
 - (i) When there is a fare construction surface sector, the hip check applies to the point of such surface sector that is not the fare construction surface sector unless the time interval between the arrival and departure at such point does not constitute a stopover as defined in resolution 012. However, such check shall not apply between the terminal points of the unflown sector.
 - (j) Notwithstanding the above
 - (aa) For journey originating in western Africa, the hip check in each fare component shall be applied on all ticketed points in western Africa.
 - (bb) For journey wholly between Kilimanjaro and Nairobi, the hip check in each fare component shall be applied on all ticketed points.
 - (cc) For journeys originating in Malawi, the hip check in each fare component shall be applied on all ticketed points in Malawi.
 - (k) Day-of-week-application in establishing the day-of-week fare level to be used for the hip check the rule for the application of the day-of-week fares shall be applied solely to the sector(s) for

which the check is being made. The day of travel on such sector(s) shall be used to determine the day of week fare level to be used for the hip check

Example:

Routing: GVA-FRA-CAI-AMS-GVA
first fare component (GVA-CAI)
Fare GVA-CAI is established using the day of week of the first international sector GVA-FRA
fare GVA-FRA is a non-day-of-week fare

there are day-of-week fares FRA-CAI with the rule that the first international sector determines the day of the week fare to be applied to established the day-of-week fare level to be used for the hip check on the sector FRA-CAI the date of travel FRA-CAI will be used

second fare component (fare in the direction from GVA-CAI)
Fare GVA-CAI is established using the day of the week of the first international sector GVA-AMS.

Note: The first international sector is taken in the direction of the fare component

fare GVA-AMS is a non-day-of-week fare

there are day-of-week fares AMS-CAI with the rule that the first international sector determines the day-of-week fare to be applied to establish the day-of-week fare level to be used for the hip check on the sector CAI-AMS the date of travel CAI to AMS will be used.

- (1) Seasonality application
in establishing the seasonal fare level to be used for the hip check the rule for the application of the seasonal fares shall be applied solely to the sector(s) for which the check is being made. The seasonal rule for such sector shall be used to determine the seasonal fare level to be used for the hip

check. Where reference in a seasonal rule is to a specific segment of travel, e.g. First international sector, the specific segment shall be assessed within the sector(s) for which the hip level is being established.

Example:

Routing: GVA-PAR-CAI-PAR-GVA
first fare component (a to c)
fare GVA-CAI is a non-seasonal fare
fare GVA-PAR is a non-seasonal fare
there are seasonal fares PAR-CAI
with the rule that the first international sector determines the seasonal fare to be applied to establish the seasonal fare level to be used for the hip check on the sector PAR-CAI the date of travel PAR-CAI will be used
second fare component (fare in the direction from a to c)
Fare GVA-CAI is a non-seasonal fare
fare GVA-PAR is a non-seasonal fare
there are seasonal fares PAR-CAI
with the rule that the first international sector determines the seasonal fare to be applied to establish the seasonal fare level to be used for the hip check on the sector CAI-PAR the date of travel CAI to PAR will be used.

- (7) Mixed class travel (Applicable to normal f, c and y fares only)
- (a) Mixed class travel is when an itinerary involves travel in two or more classes of service:
 - (i) On a sector(s) within a fare component
 - (ii) In an entire fare component of a journey/subjourney with more than one fare component
 - (iii) In an entire pricing unit (PU)
 - (b) In assessing the fare for mixed class transportation, special fares must not be used.
 - (c) Differentials are assessed in the same direction as the fare used for the lowest class of service.
 - (d) When half round trip fares are used, differentials are assessed using half round trip fares. When one way fares are used; differentials are assessed using one way fares.
 - (e) Class differential calculation is only

- subject to the hip check; no further minimum checks apply
- (f) when comparing normal fares of the "same class of service", in order to determine the fare to be used in a class differential calculation, the following sequence shall apply: if no sleeper seat fare, use first class fare. If no first class fare, use business class fare. If no business class fare, use premium economy class fare. If no premium economy class fare, use economy class fare provided that where more than one economy class fare is published, use the highest economy class fare.
 - (g) Fare calculation
 - (i) Establish the fare for the itinerary in the lowest class of service used applying all necessary fare construction checks; provided that if no fare is found in the lowest class of service used, drop down to the next lower class of service common to all the fare components in the pricing unit.
Example:
TYO C SEL F TSN C DLC C TYO (sector fares) when there is no C fare available for SEL TSN, calculate with premium economy fare for the entire pricing unit and apply ctm check using premium economy fares.
 - (ii) Establish whether as a result of (i) Above the mixed class sector(s).
 - (aa) apply within a fare component; or
 - (bb) constitute an entire fare component; or
 - (cc) constitute an entire pricing unit
 - (iii) Mixed class sector(s) within a fare component if the calculation in the lower class of travel establishes that the mixed class sector(s) fall within a fare component, the differential for the sector(s) travelled in a higher class shall be the lowest of the following:
 - (a) The difference between the lower class fare for the sectors flown in the higher class and the fare for the higher class of travel in those sectors.
 - (b) The difference between the applicable fare for the fare component in the lower class of service and the applicable fare for the fare component in the higher class of service for consecutive

- sectors within a fare component travelled in a higher class of service, the difference shall be the lower of (1) The difference between the lowest of applicable fare for the lowest class of service used and the lowest applicable fare for the higher class of service used, or (2) Lowest applicable through fare for the lowest class used for the sectors concerned and the lowest applicable through fare for the higher class used for such sectors.
- (iv) An entire fare component in a higher class if the calculation in the lower class of travel establishes that the mixed class sector(s) constitute an entire fare component(s), the differential shall be the difference between the applicable fare for the lower class of travel for the fare component and the applicable fare for the higher class of travel for the fare component.
- (v) An entire pricing unit in a higher class if the calculation in the lower class of travel establishes that the mixed class sector(s) constitute an entire pricing unit, the differential shall be the difference between the applicable fare for the lower class of travel for the pricing unit and the applicable fare for the higher class of travel for the pricing unit.
In applying this methodology the resultant level will only be applied if it gives a lower level than other calculations.
- (8) Minimum fares
having established the international fare for a one way, open jaw, circle trip, or around the world journey in accordance with normal rules, including the higher intermediate fare rule and mileage surcharge where applicable, a separate calculation, ignoring mileage surcharge, must be made. When this separate calculation results in a higher fare, such higher fare must be charged.
- (a) One way backhaul
- (i) This paragraph does not apply
- (aa) For pricing units wholly within tcl
- (bb) For pricing units between Argentina, Brazil, Chile,

- Paraguay, Uruguay and tc2.
- (ii) This paragraph applies only when using normal one way pricing units.
 - (iii) If any fare component travel is via a higher rated immediate stopover point, the fare for such fare component shall be the higher of:
 - (aa) The applicable fare between the fare construction points, or
 - (bb) The fare from the fare component origin to the highest rated intermediate stopover point plus the difference between such fare and the direct route fare between the fare construction points.Examples: A-B-C-D
fares a to b NUC 50
A to C 150
A to D 140
B to C 175
B to D 160
fare to be charged is B to C NUC 175 or
A to C NUC 150 plus the difference between a to c and a to d 10 ttl
NUC 160 (whichever is higher)
The one way backhaul rule check need not to be applied for points which have been excluded from the provisions of this resolution, subject to the same conditions contained in the exclusion.
- (b) Separate fares are assessed for side trips.
 - (c) Circle trip minimum
the fare for a circle trip shall be not less than the highest direct normal or special round trip fare, as appropriate, applicable to the lowest class of service used from the point of origin to any stopover point on the route of travel, excluding any separately assessed side trips.
 - (d) Fares for other than round or circle trips (the following rules apply to all fares except round trip special fares) (see note)
 - (i) For transportation wholly within Area 1
 - (ii) For sales made in Area 1 for transportation commencing in Area 1
 - (iii) For sales made in Canada/U.S.A./U.S. Territories for international travel commencing outside this area that has its destination or point of turnaround in this area.
 - (iv) When travel originates in Benin, Burkina

- Faso, Cameroon, Central African Republic, Chad, Congo, Cote d'Ivoire, Equatorial Guinea, Gabon, Ghana, Liberia, Mali, Niger, Senegal or Togo and is sold in another of these countries.
- (v) For the sale in the U.S.A. And US territories of fares between foreign points, the fare to be charged shall be based on the actual direction of travel.
 - (aa) Common point check
 - (i) Fares sold in foreign countries for transportation to/from Canada and fares sold in Canada for foreign originating travel are the fare and conditions of carriage as stated in the lawful tariffs on file and in effect with the national transportation agency or the competent foreign air authority and in each case be calculated in the direction of travel.
 - (ii) For sales in Canada in Canadian dollars, the fare shall be converted into Canadian dollars at the applicable banker's buying rate of exchange in effect on the day of transaction at the Canadian point of sale.
 - (f) Around the world minimum
 - (i) After an around the world fare has been constructed, all stopover points on the routing, including fictitious construction points, must be checked to see whether any round trip fares exist from the point of origin to any stopover points on the routing including points on a side trip which are higher than the constructed fare. The fare for an around the world journey must be less than the highest direct normal round trip fare applicable to the cabin of service used from the point of origin to any stopover point on the route of travel. In general, Transatlantic round trip fares from the point of origin to other points on the routing differ from the corresponding Transpacific round trip fares from the point of origin to the same points. For the purpose of

- this rule, Transatlantic round trip fares must be compared with Transpacific round trip fares from point of origin for each stopover point on the routing and the lower of the two will be considered the direct fare.
- (ii) One class of service
the fare for an around the world journey traveled in one class of service must not be less than the highest direct round trip fare from the point of origin to any ticketed point on the routing.
 - (iii) Different classes of services
the fare for an around the world journey involving different classes of service must not be less than the highest direct round trip fare for the lowest class of service assessed, from the point of origin to any ticketed point on the routing plus applicable differentials for sectors traveled in higher classes of service.
- (g) Unpublished fares
when an itinerary includes a ticketed point for which no through fare is published, or for which a fare is published in only one global direction, the fare for such point/global direction should be constructed by using whichever particular combination of fare results in the lowest fare.
- (i) Normal fare construction principles apply.
 - (ii) If the itinerary includes more than one unpublished point/global direction, separate fare calculations must be made for each such point/global direction.

Rule 135 Stopovers

- (A) Except as otherwise provided in this rule, stopovers within the validity period of the ticket will be permitted at any scheduled stop unless carrier's tariffs or government regulations do not permit a stopover at any such stop.
- (B) Stopovers must be arranged with carrier in advance and specified on the ticket.
- (C) Cancelled
- (D) A stopover takes place when a passenger breaks the journey at an intermediate point and is not scheduled to depart on the day of arrival; or within 24 hours of arrival if there is no connection on the day of arrival. When there is no 4Y connecting departure scheduled on the date of arrival, departure on a 4Y flight the following day shall not be deemed a stopover.
